CD-1 makes high-side intelligence data available at the tactical edge.

CD-1 Carbon
—— An All-Source Intelligence Solution for the Edge

Palantir USG's CD-1 capability allows the warfighter to access all-source military intelligence at the tactical edge.

By providing out-of-the-box data integrations with key intelligence sources, CD-1 accelerates intel analyst workflows and decision-making in the battlefield.

CD-1 is an expanding POR that streamlines and accelerates processes such as IPB and MDMP. The CD-1 system allows warfighters to quickly perform and share:

→ Geospatial Analysis
→ Threat Analysis
→ Link Analysis
→ Weather Effects Analysis
→ Battle Damage Assessments
